

MUHAMMED SHAHID SIDDIQUI

✉ teamworkwithshahid@gmail.com | 📞 +91 99304 36814 | 🔗 LinkedIn | 🐙 GitHub | 🌐 Portfolio

Education: Mumbai University — May 2023 — B.E. (Computer Engineering) — **CGPA: 8.96**

iOS & AI-Native Software Engineer with **3.5+ years** shipping consumer apps at **30+ lakh DAU**.
Expert in **MVVM, Clean Architecture, Protocol-Oriented Programming (POP)**, and Generics.
Skilled in **on-device AI, SDUI, Context Engineering** (Cursor, Claude, Copilot), concurrency, and **Flutter**.

Technical Skills

Languages: Swift, Dart, Python, TypeScript

iOS: SwiftUI, UIKit, Foundation, Combine, AVFoundation, LocalAuthentication, StoreKit, URLSession, UserNotifications, XCTest, XCUITest

Architecture & Patterns: MVVM, MVC, MVI, Clean Architecture, Protocol-Oriented Programming (POP), Generics, Server-Driven UI (SDUI), CMS Integration

On-Device AI / ML: Apple Intelligence (Foundation Models), TFLite, Gemini Nano, BM25 & Embedding-Based RAG, Cosine Similarity Retrieval

Concurrency: GCD, OperationQueue, async/await, Combine, Actor Isolation, Thread-Safe Data Structures

Security: SSL Pinning, Domain Whitelisting, Biometric Auth (Face ID / Touch ID), HTTPS Enforcement, HMAC-SHA1 TOTP

Backend & Integrations: REST APIs, Firebase (Crashlytics, Performance, Analytics, Remote Config), Mixpanel, Airship, NestJS, Prisma, Next.js

Cross-Platform: Flutter, Dart, Provider, Hive

Tooling & CI/CD: Xcode, Instruments, TestFlight, GitHub Actions, Cursor, Claude, GitHub Copilot

Architecture Expertise

- **Design Patterns:** MVVM, MVC, MVI, and Clean Architecture (View / ViewModel / Domain / Data); legacy migrations with zero-regression delivery.
- **Protocol-Oriented & Generic Programming:** Swift Protocols, Generics, and associated types for type-safe ad pipelines, form systems, and SDK interfaces.
- **iOS Platform Expertise:** Application lifecycle, deep linking, push notifications, HIG, adaptive layouts, accessibility, and responsive UI.
- **On-Device AI & Edge ML:** Offline RAG (BM25, embedding retrieval), **Apple Intelligence, TFLite, Gemini Nano** with fail-soft fallbacks — privacy-first, zero cloud-LLM dependency.
- **Server-Driven UI (SDUI) & Concurrency:** CMS/remote-config driven headers, search, banners; **GCD, OperationQueue, async/await, Combine, actor isolation**; synchronised dictionaries and read-write locks.
- **Context & Prompt Engineering:** Cursor, Claude, and Copilot for architecturally sound, review-ready Swift delivery at accelerated velocity.

Experience

District By Zomato

Jan 2026 – April 2026

Software Development Engineer

Gurugram

- **iOS App Development:** Delivered Free Parking for billing adjustments; resolved production issues on-call.
- **Architecture & AI Development:** Cursor, Claude, and GitHub Copilot with **Context Engineering** for MVVM / Clean Architecture migrations; AI-assisted **code reviews, test case generation** (XCTest / XCUITest), and **structured logging**.

BookMyShow

Oct 2024 – Jan 2026

Software Development Engineer – 1

Mumbai

- **High-Scale Engineering:** 30+ lakh DAU app at 99.95%+ **crash-free sessions** via Firebase Crashlytics triage and structured crash workflows.
- **LE Bottom Sheet:** End-to-end event-overview component cutting full-screen navigations for 30%+ of user flows.

- **Ads Module (Revenue-Critical):** Refactored highest-revenue module; **pause/play lifecycle** for video ads in reusable **HeroWidget**; **POP + Generics** type-safe rendering pipeline.
- **Payment Processing Popup:** Real-time payment/booking status popup to reduce checkout drop-off and support queries.
- **Observability, Concurrency & Backend-Driven UI:** Firebase Performance p50/p90 traces (listing, checkout, search); **synchronised dictionaries** via GCD serial queues and read-write locks; protocol-driven header; search with debouncing and MVVM alignment.
- **Security, CI/CD & IMOC:** Ads migrated Alamofire → **URLSession**; **HTTPS** and **SSL pinning with domain whitelisting**; GitHub Actions for build, lint, **TestFlight**; AI-assisted PR reviews; coordinated **P0/P1** incidents (IMOC).

Raw Engineering

Jan 2023 – Oct 2024

Associate Software Engineer (iOS + Flutter)

Mumbai

- **Multi-App Ownership (NBA/WNBA):** Production iOS apps for **Memphis Grizzlies**, **Miami Heat**, **Las Vegas Aces**, and **Chicago Sky**.
- **Memphis Grizzlies** (*SwiftUI*, *UIKit*, *Deeplinks*, *Mixpanel*, *Airship*): **SwiftUI+UIKit interoperability**, deep linking, lifecycle handling; Mixpanel and Airship.
- **Miami Heat & Stories SDK** (*SwiftUI*, *Live Updates*): Standalone reusable **Stories SDK** adopted portfolio-wide; managed **live in-arena scoreboard**.
- **Las Vegas Aces & Chicago Sky** (*UIKit*, *Deeplinks*, *TicketMaster*, *SDKs*): **Audio streaming** for live broadcasts; server-driven splash cutting cold-start latency; led **Xcode 15 migration** with zero-regression checklist.

Projects

BookMyShow

India's #1 Ticketing App

UIKit, *SwiftUI*, *MVVM*, *Backend-Driven UI*, *Firebase*, *SSL Pinning*

- **30+ lakh DAU**; **99.95%+ crash-free sessions**. Owned Ads Module, LE Bottom Sheet, backend-driven header, search modernisation, SSL pinning, concurrency-safe shared state.

Miami Heat iOS App

NBA Fan Engagement

SwiftUI, *Standalone SDK*, *Live Updates*, *REST API*

- Reusable **Stories SDK** for Instagram-style fan content, adopted across the portfolio; **in-arena live scoreboard** for real-time match stats.

District by Zomato

Consumer Super App

Swift, *MVVM*, *Clean Architecture*, *XCTest*

- **Free Parking** billing feature; **Context Engineering** with Cursor and Claude for MVVM / Clean Architecture migration with zero regressions.

FinTrack – On-Device AI Expense Tracker

Personal Product

Flutter, *Dart*, *Hive*, *BM25 RAG*, *Apple Intelligence*, *Gemini Nano*

- Privacy-first, local-first expense tracker with offline Hive storage and biometric lock — **no cloud sync of financial data**. On-device AI Savings Coach via **Apple Foundation Models / Gemini Nano**, **BM25 offline RAG**, and rule-based fallback.

GymFlow – Gym Operations Platform

Personal Product

NestJS, *Prisma*, *Next.js*, *Flutter*, *TFLite*

- Multi-role B2B on **NestJS + Prisma** with Next.js portal and Flutter app. Geofenced QR + **HMAC-SHA1 rotating TOTP**; on-device **MiniLM (TFLite)** workout recommender with RAG — no cloud LLM.
